Shanghai YL Biotech Co., Ltd.

www.ylbiont.com

YL Biont is a collection of research, production, sales as one of the leading international biological high-tech enterprise. The company focused on the immune detection reagents of independent research and development, the main products include ELISA kit, CLIA kit, protein, antibody, mark kit and other related reagents, which a total of more than 20000 products! Through the national support and new high-tech industries promoted, we has been the advanced production technology in the field of biological kits.

Antibody

- Polyclonal Antibodies
- Monoclonal Antibodies
- Secondary Antibodies

Kit

- ELISA Kit
- Molecular Biology Kit
- Clia Kit

Protein

- Native Protein
- Recombinant Protein
- Active Protein

www.mybiosource.com

Founded originally in Vancouver, British Columbia in 2006 by three enthusiastic scientists passionate about providing the best biological reagents worldwide, MyBiosource, Inc. was incorporated as a company with big visions. Since 2007, we have relocated our headquarters to sunny Southern California, San Diego (USA). As a goal towards achieving our primary mission, we aim to provide our customer base of researchers and scientists with a one-stop searchable collection of biological reagents, such as monoclonal or polyclonal antibodies, recombinant proteins or ELISA kits.

- ELISA Kit
- CLIA Kit
- PCR Kit
- Monoclonal Antibody
- Polyclonal Antibody
- Secondary Antibody
- Antigen
- Biochemical
- cDNA Clone
- siRNA
- Peptide
- Rec./Purified Protein

www.biomatik.com

We have been proudly serving 10,000+ scientists since 2002. To date, in addition to our catalog products, Biomatik has delivered 52,000+ custom made products to our researchers worldwide.

Products

ELISA Kits

Biomatik offers over 22,000 quality ELISA kits at highly competitive prices! ELISA (linked immunosorbent assay) is a powerful tool for measuring proteins in biologic samples. Based on the sample types, there are different ELISA testing methods are developed for testing

Antibodies

Biomatik offers over 26,000 quality catalog antibodies at highly competitive prices with 100% satisfaction guarantee

Proteins

Biomatik offers over 15,000 quality proteins at highly competitive prices with 100% satisfaction guarantee

Biochemicals

Biomatik offers over 300 quality Biochemicals at highly competitive prices with 100% satisfaction guarantee

BioVendor immunoassays, recombinant proteins, monoclonal and polyclonal antibodies have been developed to provide powerful and helpful tools for biomedical research and diagnostic laboratories.

Products by Research Topic

- Aneurysmal subarachnoid hemorrhage
- Animal studies
- Apoptosis
- Asthma and allergic rhinitis
- Atherosclerosis
- Autoimmunity
- Blood pressure regulation and NO metabolism
- Bone and cartilage metabolism
- Cardiovascular disease
- Cell adhesion proteins
- Cell apoptosis, Cell cycle and Cell migration
- Cell surface proteins (sCD)
- Chemokines
- Chronic renal failure
- Coronary artery disease
- Cytokines and chemokines and related molecules
- Diabetology - Autoimmunity
- Diabetology - Insulin, C-Peptide, Proinsulin
- Diabetology - Other Relevant Products

- Energy metabolism and body weight regulation
- Extracellular matrix
- Growth hormone and factor-related products
- Immune Response, Infection and Inflammation
- Immunology
- Inflammatory bowel disease
- Iron metabolism
- Lipoprotein metabolism
- Metabolic syndrome
- Muscle growth control
- Neural tissue markers
- Oncology
- Oxidative stress
- Pancreatic regulatory molecules
- Pulmonary diseases
- Renal disease
- Reproduction

- Secreted phospholipases A2
- Sepsis
- Serology
- Steroid hormones

invitrogen

by Thermo Fisher Scientific

www.thermofisher.com

Invitrogen cell, protein, and molecular biology technologies range from Lipofectamine reagents, TOPO cloning kits, and SuperScript and Platinum enzymes, to western blotting technologies, antibodies, and the GeneArt Gene Synthesis service.

echelon®

your partner in research

www.echelon-inc.com

Echelon Biosciences Incorporated (EBI) was incorporated under the laws of the state of Utah as Echelon Research Laboratories, Inc. on October 3, 1997. Initially, EBI was formed from a project under the Center for Cell Signaling, a State of Utah Center of Excellence, with the aim to further the science of lipid cell signaling and critical metabolic enzymes, which provide new and viable targets for the development of potential drugs and diagnostics for cancer, diabetes, inflammation, infections, and cardiovascular disease. Since 1997, EBI has retained its commitment to developing novel assays and reagents for lipid research and beyond.
